EXPERIENCE

JUNIOR SOFTWARE DEVELOPER | Serraview
May 2018 – Present

- Work with the product owner and designer to translate product requirements and designs into UI components that are cross-browser compatible and responsive.
- Design and build components with unit tests that are clean and efficient.
- Integrate React components with a Ruby on Rails back-end.
- Incorporate custom CSS (SCSS) with libraries and frameworks such as Ant.Design and Bootstrap and assist colleagues with CSS.
- Participate in daily stand-ups and contribute to sprint planning and retrospective meetings.

FRONT-END DEVELOPER (INTERN) | Serraview
February 2018 – March 2018

- Reviewed and fixed bugs in an AngularJS codebase.
- Wrote unit tests using Jasmine and conducted manual tests on new enhancements with QA.
- Participated in daily standups, and sprint planning and retrospective meetings.

PROJECT OFFICER, ONLINE SERVICES | State Library of New South Wales
August 2011 – March 2017

- Produced high quality, user-driven online content that was useable, readable and accessible.
- Administered the Ask a Librarian service application which included developing workflows, designing and building HTML email templates, writing documentation, identifying bugs, participating in user acceptance testing and working with the vendor on product enhancements.
- Worked on Library-wide web content projects to improve the user experience.
- Implemented and improved online services such as the room booking system which included writing documentation and conducting training.

ELECTRONIC RESOURCES MANAGER | EBSCO
December 2008 – August 2011

- Worked with clients to implement and customise products and provided ongoing product support.
- Supported the Sales Department in tenders, trials and sales including partner products.
- Contributed to product development to ensure products met the needs of the Australian market.
